UNIVERSITY OF TWENTE.

M12 – 2023
RESEARCH PROJECT

INTRODUCTION

Meetings today

Week	Date	Activity	By whom
46 (1)	November 13 (Mon), 8:45-9:15	Module Introduction	Alex Chiumento
	November 13 (Mon), 9:15-9:45	Tutorial: How to write a research proposal	Paul Havinga
	~~November 13 (Mon), 9:45-10:30~~	~~Tutorial: How to find relevant scientific information~~	~~S Mek~~
	November 13 (Mon), 10:45-12:30	Track meetings and selection deadline of a research topic	Track chairs and Students

The purpose of this module

To get a first-hand experience of the research methodology, to understand the inner workings of developing your own research questions and finding your own answers.

And to reflect on the impact of your work on you as a person and on the world at large.

(Some of) the module has two parts

- Research project
  - 10 EC

ONLY FOR BIT STUDENTS

- Reflection
  - 5 EC

ERSITY
WENTE.

Research Project Module M12

https://canvas.utwente.nl/courses/13831

Introduction	Schedule	Research Component - Course Materials	Reflection Component- Course Materials	Contact

The research project module aims to teach students how to perform research and acquire skills in several phases of carrying out a research project. This includes defining among others the problem statement and motivation, the state of the art, methodology, approach, planning, perform research, reflection, writing, (peer) reviewing, and presentation of the results. Each student needs to complete an individual research project under the supervision of a research staff.

Learning goals of Module Research Project

- Learn how to
  - perform scientific research on a given problem
  - evaluate the quality and relevance of research
  - present the research results
  - reflect on ethical and social impact (Reflection)

The Twente Student Conference on IT

- For UT students working in different areas of IT
  - to come together, discuss, and exchange their expertise and knowledge related to various aspects of modern Information Technologies.
- The conference is organised twice a year
  - for students of the bachelor programmes Computer Science and Business Information Technology of the University of Twente
- Call for papers
- Paper submissions to Easychair

Research topics

- The conference has the following tracks
  - Intelligent Interaction
  - Information management
  - Formal methods and software technology
  - Pervasive computing and Internet of things
  - Network systems and network security
  - Data science
  - Sustainable AI
  - Information systems services and interoperability

Research topics

- The conference has the following tracks
  - Intelligent Interaction (CR 3D)
  - Information management (HB 2A)
  - Formal methods and software technology (HB 2F)
  - Pervasive computing and Internet of things (OH 112)
  - Network systems and network security (HT 700A)
  - Data science (CR 3A)
  - Sustainable AI (RA 2237)
  - Information systems services and interoperability (RA 3231)

4 Phases of the Research Component

(details are in the Students' manual)

Phase 0 preparation (before the module)	- Sign up to a track and register a topic with the track chair
Phase 1 proposal (W1-W2)	- Write a proposal and get a go **from your supervisor** within 2 weeks - Fill in an ethics review form and get a go from the ethics committee (depending on topics)
Phase 2 paper (W3-W10)	- Draft paper submission and review in Easychair - Final paper submission and review in Easychair - Camera ready paper submission to Easychair and UT theses system
Phase 3 conference (W11)	- Presentation trial during track meetings - Presentation during the conference

Tutorials (mandatory)

Introduction	Schedule	Research Component - Course Materials	Reflection Component- Course Materials	Contact

- *How to write a research proposal (**today**)*
- *How to find relevant information (slides)*
- *How to perform research (video)*
- *How to write a scientific paper (**December**)*
- *How to present a paper (video)*

Important dates (other dates are in the “Schedule” file)

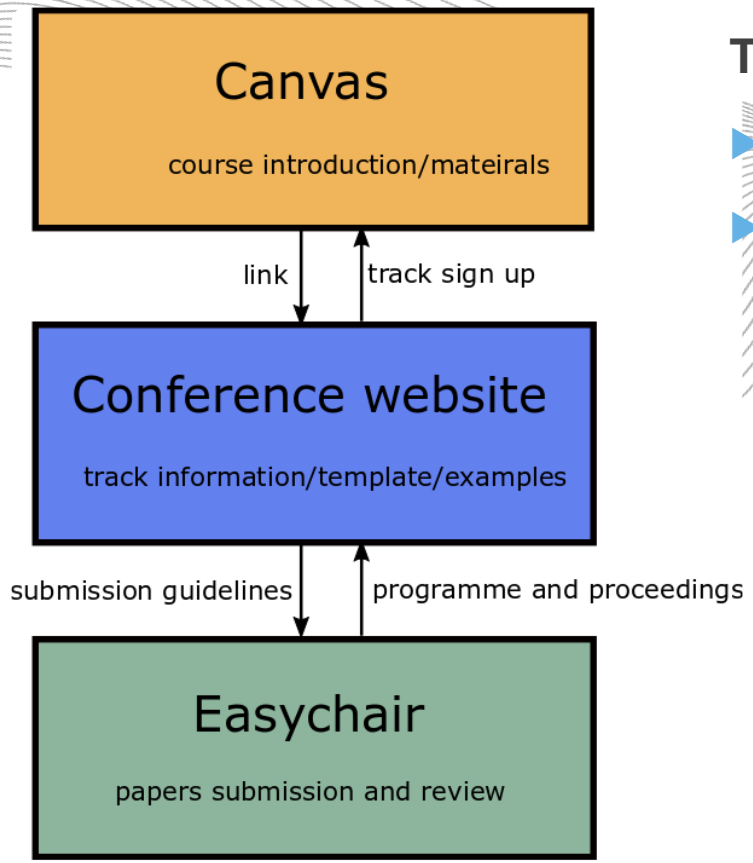

Grading

- Quality of research proposal and peer review
  - Pass – no pass

Rubrics are in Students' manual !

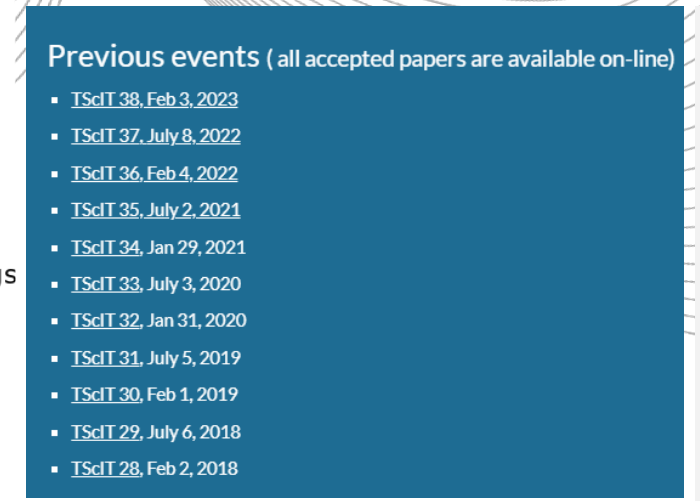

- Research paper
  - Scientific quality – 50%
  - Presentation (paper and presentation at conference) – 30%
    - Paper writing and structure – 20%
    - Oral presentation – 10%
  - Process – 20%
    - Independence, planning, critical attitude, creativity
    - Attending track meetings and online lectures, and performing peer reviews

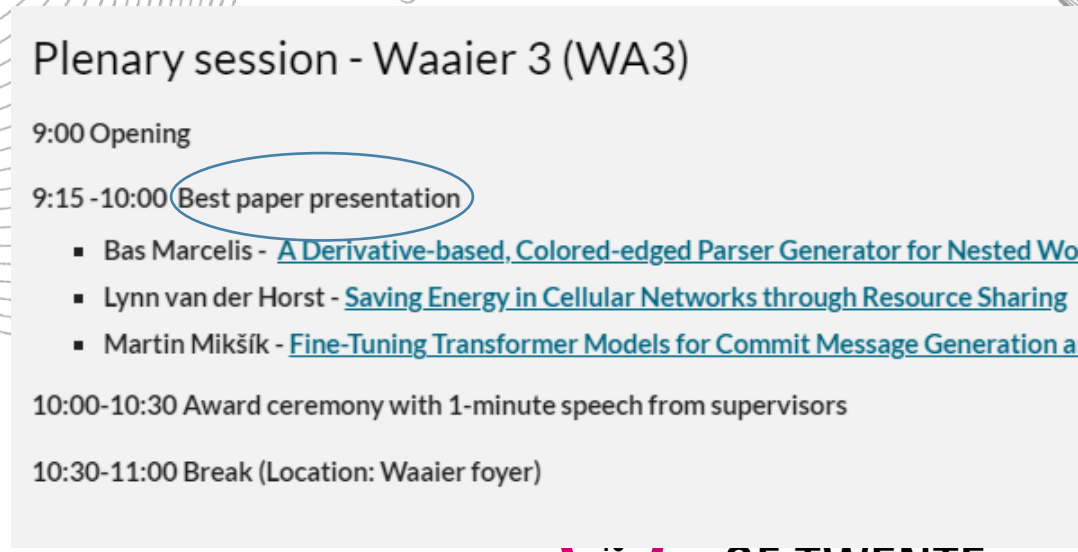

Tools and Tips

Tips to find past accepted papers

- Go to 40tscit conference website, @past editions, a list of previous events
- e.g. click 39tscit, @Programme and Proceedings, all accepted papers

Check Students' manual for details

Contact

First check students' manual and FAQ about M12 Research Project (link is in Osiris and students' manual)

- General information about the module→ module-12-tcs-bit-eemcs@utwente.nl
- Personal concerns about the module→ Alex Chiumento
- Reflection component→ Sandra Calkins
- Track related→ track chairs
- Administration related, e.g., mobility online,→ programme coordinators, Sharon Vonk of TCS or Joyce Van Baaren of BIT.

A quick recap

- The research component will make use of Canvas, TSCIT website and Easychair
- You will need to submit a research proposal and a research paper
- Tutorial and track meetings are both mandatory
- All the steps and dates are in the student manual and the schedule
